DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record, Ueno et al. to 6,492,690 B2 teach in Figs.33-41 and related text a method of manufacturing a semiconductor device including preparing a semiconductor substrate (51) having a memory cell area and a logic area; forming a gate insulating film (53) on the substrate (51); forming a silicon film (550) on the gate insulating film (53); doping impurities into the silicon film (550) such that the concentration of said impurities in said logic area is higher than the concentration of said impurities in said memory cell area; patterning the silicon film (550); and forming source and drain regions (156) (column 44, line 55 – column 48, line 60). However, Ueno et al. do not teach doping impurities in a silicon film to make a region of the silicon film in the memory cell area having a first impurity concentration and to make a region of the silicon film in the logic cell area having a second impurity concentration lower than the first impurity concentration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
